

Practice Problems: Double Displacement Reactions

See the complete solutions to these problems at https://www.youtube.com/watch?v=5ukX0fTCQ_g.

Predict the products and write balanced equations for the following double displacement reactions:

1. lithium carbonate + magnesium bromide →

2. iron(II) sulfate + sodium phosphate →

3. nitric acid + lithium sulfide →

4. nickel(II) chloride + potassium bromide →

5. ammonium permanganate + lithium hydroxide →

6. barium hydroxide + hydroiodic acid →
